Course Overview

This 3 day executive training program provides senior logistics and supply chain professionals with the knowledge, tools, and strategies to transform their warehousing and logistics operations through artificial intelligence, automation, and digital innovation. Participants will explore global logistics trends, learn to evaluate AI applications in warehouse design, and develop sustainable, future ready logistics strategies through practical simulations and real world case studies.

Key Learning Outcomes

- Understand global supply chain megatrends and the impact of AI driven transformation.
- Distinguish between generative and agentic AI and apply them to logistics and warehousing challenges.
- Identify appropriate automation and digital technologies to drive efficiency and resilience.
- Design a cost efficient, data driven warehouse ecosystem with real time visibility.
- Apply sustainability, carbon tracking, and circular logistics principles in operational design.
- Develop a 90 day pilot plan to implement smart logistics initiatives in your organization.

Why You Should Attend?

- Stay Ahead of Disruption – Learn how AI and digitalization are reshaping global logistics and warehousing.
- Leverage Technology for Impact – Explore how automation, IoT, and predictive analytics create agile, responsive supply chains.
- Future-Proof Operations – Build strategies for network resilience, cost optimization, and sustainable growth.
- Gain Actionable Tools – Participate in case studies, simulations, and group exercises to apply learning immediately.
- Walk Away with a Plan – Conclude the program with a personalized 90-day roadmap for transformation.
